Refer a business

Stratford energy solutions

Building an energy-secure future for British business

Every day, we are helping more businesses reduce energy costs, make better use of their buildings and plan for the future with a carefully designed commercial solar panel system.

Through our Solar Neighbours Commercial Referral Programme, you could help us spread the benefits of solar energy and earn your own business (or a charity of your choice) a referral bonus of up to £1,750.

So, if you know of a business that could benefit, all you need to do is make an introduction and we'll take care of everything from there.

Your referral reward

Your business or charity will receive **£250*** when your introduction results in a consultation meeting with Stratford Energy Solutions.

If the referred business subsequently completes a solar panel installation with us, there will be a further bonus of:

- **£500** for an installation below 100kWp;
- **£750** for an installation from 100kWp to below 250kWp;
- **£1,000** for an installation from 250kWp to below 500kWp; or
- **£1,500** for an installation of 500kWp or more.

*A £250 introductory reward applies to qualifying referrals received by 31 December 2026. From 1 January 2027, the reward reverts to £100 per qualifying referral.

Choose how you receive it

Your reward can be provided as:

- a payment to your business;
- credit against future Stratford Energy Solutions services; or
- a donation to a nominated registered charity.

A benefit for the business you introduce

If the referred business completes a qualifying solar panel installation, it will also receive a complimentary first year of our Energy Assured monitoring and performance service.

Making an introduction is easy

1. Introduce us by email

Email the person you would like to introduce and copy Jamie Brown at jamie@stratfordenergy.co.uk

You can use or adapt this wording:

Hi [Name],

I wanted to introduce you to Jamie Brown at Stratford Energy Solutions. They installed our solar panel system and are currently helping businesses explore whether solar could work for them, so I thought this might be of interest to you.

Jamie – I'll leave you both to take it from here.

2. Forward this flyer

Alternatively, forward this information and ask the business to contact Jamie, mentioning your company's name when they do so.

What happens next?

Once we've been introduced, we'll arrange an initial conversation. If the introduction results in a qualifying consultation, we'll confirm your reward and take care of everything from there.

A referral must introduce us to an appropriate business contact and result in a consultation meeting. The business must not already be in active discussions with Stratford Energy Solutions or have received a consultation, site survey or proposal from us during the previous 24 months. The first valid referrer takes priority.
Full terms and conditions apply: www.stratfordenergy.co.uk/commercial-referral-terms-conditions

Start spreading the word today

If you have any referrals or questions about this programme, or indeed further questions about your own commercial solar and energy requirements, simply email or call Jamie Brown today. Together, we look forward to building a brighter and energy-secure future for British business!
